285 H37 they make made by friends. Ma Aye Myaing and Daw Aw Zar appear to specialise in the larger mats such as used for sleeping. Mat making appears to be an occupation which in ordinary times is unimportant but it is relied heavily upon in bad times.

461 562 561 [277] 874 [294] The children are put to work around the house and in processing the fish at an early age. Just recently U Myaing's eldest daughter left school to learn a trade. She left one month ago from the fourth standard, to learn cheroot rolling. In another month's time she will have learnt how. She does not have to pay any fees - neither is she paid for her help. She lives with her aunt (U Myaing's sister) and has her meals there. Near their house there is also an embroidery shop which is owned by her aunt. At night U Myaing's daughter is taught embroidery and sewing by her aunt. The owner of the cheroot rolling shop is not a relative, but the women who work there are aunts and grand-aunts of the girl. When she has learnt the trade, then she will be paid between two and three rupees a day on piece work basis.

463 363 512 At present (May 1951) U Myaing is working as a sweeper in the Rangoon Municipality on a monthly wage of Rs. 80/-. There is an overseer placed over him every day. U Myaing's main job is to keep one street in town clean. He leaves his house at six and arrives at the overseer's by half past six and there a roll-call is taken of about a hundred of them. At seven he begins on his street and stops at about half-eight to go to answer the roll-call (see below for rest of schedule).. He has personal contact only with the overseer, the doctor and the MUNDAUK (official). All three of them go around the town to see if they work hard enough. The MUNDAUK also comes everyday to witness the roll-call. "If we do not do good work we shall be dismissed. Everything is in their hands. But they do so after two or three warnings. We do not possess any rights at all. Sometimes offenders are sent to other streets that require harder labour. "

U Myaing's street is located in Myeni-gon, and he has to clean the street of dirt as well as clean the drains on either side.

His daily schedule at present is as follows: He rises at 4, washes his face and cleans his teeth, says his prayers and then has plain tea which Ma Aye Myaing has prepared for him. At six he leaves

about three million rupees. At present both wood-oil and crude earth-oil are being superseded by kerosene. The crude earth-oil is used for preserving woodwork. But its place is being taken by the residues from the local refineries, now established in Rangoon.* Travelling pedlars hawk the silk goods of Burma Proper and all sorts of fancy nicknacks from the sea-ports to the villages of the interior. The approaches to the temples are favourite resorts of stall-keepers of all sorts of wares, especially of wax-tapers, plain and moulded, gold leaf, coloured paper flags and flowers for the votaries to decorate the shrines with, and toys wherewith to gladden the hearts of children—an act of merit befitting the shrine of religion in this cheerful land. In sad contrast to the gaiety of the booths is the spectacle of the lepers who beg for alms. The prominence of these unfortunates at such places creates a disproportionate impression of their numbers, high as these are (p. 41). The offerings dedicated on the occasions of *Shinldung fêtes*, festivals, and funerals, make the trades of manufacturing and distributing the requisites of the *kyaung* very important ones. The wares collected in the *parîkaya* shop used to be representative of the manufactures of Burma. But of late, imported goods—crockery, glassware, lamps and clocks—have become a regular part of the *kyaung* furniture, and are offered in meaningless profusion. This has helped to bring the *parîkaya* trade into the hands of foreigners.
